Java has established a dominant position as the major programming language for a wide variety of application areas. The language continues to evolve, while new APIs, libraries and tools continue to be developed. We invite papers which cover all aspects of programming in Java. Both research papers and experience reports are welcome. Papers must describe original work, and must not have been accepted or submitted for publication elsewhere. Topics include but are not limited to:

- Java Language and Systems
- Software Engineering with Java
- Applications in Science, Engineering, and Business
- Agent-Based Java Systems
- Mobile Java
- Java Practice and Experience Reports
- Teaching Java Programming

### Submission Guidelines

Four types of paper submissions will be accepted: research papers, experience reports, industry papers, and demo papers. Papers which represent original, previously unpublished work are invited. Both new ideas and case studies of the status quo are welcome. Submissions must be in ACM SIG Proceedings Format. Research papers and experience reports are limited to 10 pages, the other categories to 4 pages. For further details, please visit the conference home page at <http://www.agentgroup.unimore.it/pppj08>

Accepted papers will be published in the ACM International Conference Proceedings Series. Authors of the best papers will be invited to provide an extended version for a special issue of Elsevier's *Science of Computer Programming* journal.
